

Barrel Clamps

Barrel Clamp - Referred to as "Barrel Clamp", this hydraulic accessory is actually used on lift trucks so as to squeeze objects that you would like to move with the forklift. Typically, they are utilized in order to barrels, handle kegs, and paper rolls, together with several barrel clamp designs being able to revolve the load. Like for example, the rotate function enables the one operating the forklift to slot in a vertically stored paper into the horizontal intake of a printing press.
